

### **General Instructions about Project Code Submission CITS 4402 : Computer Vision**

Your code for the project **MUST** be accompanied with a **ReadME** file. The ReadME file should contain following:

1. The approach that you followed and partition of your data.
2. A display of your GUI showing an example.
3. Give details about the folders that you submit with your code (what do they contain).
4. Make sure the name of the folders reflects its content.
5. Detail the procedure to run your code.
6. Discuss any results, e.g., v.s. performance criteria.

Every function file should have its functionality stated at the start in comments, and should be adequately commented.

The complete submission must be in a zipped file.
